

Web Floor Plan & Report Viewer Web Data Editor

Web Based Floor Plan Viewing

The **CADapult FM Web Floor Plan Viewer** provides quick and easy access to up-to-date facilities floor plans and related information by utilizing your desktop web browser. Graphical and non-graphical facilities data is available in assorted views, which present varying levels of detail through a cascading folder index or by drilldown navigation, allowing users to select from world maps, campus drawings, building footprints, and floor level drawings to display floor plan detail information. PDF files can be automatically generated on a scheduled basis and the results are waiting for you in the morning upon arriving at the office.

Live View!

Live View is just that, a live view of your floor plans, which provides the ability to search for information and have it highlighted quickly and easily. Access to accurate space plans with zoom, layer, and query and print control provides a centralized resource to all personnel without the need to know AutoCAD. Graphic queries can highlighting Vacant Spaces, Departments, Space Types and searching for Personnel or Assets is easily accomplished with this tool. Pictures of spaces and personnel can also be linked.

- Integration with the CADapult FM Web Move Manager to provide up-to-date occupancy information and display scheduled move locations graphically.
- Integration with the CADapult FM Web Maintenance and Facility Assessor applications for viewing of scheduled tasks assigned to spaces and equipment.
- Integration with the CADapult FM Work Place Ready Hotel Space Reservations and Meeting Room Scheduler allows viewing and scheduling hotel spaces and meeting and training rooms direct from floor plans

CADapult FM Web Data Editor

Hyperlinks at the room, personnel and asset labels and when selected, displays space, personnel, asset, maintenance, and other useful information. Security rights can be set by an application administrator to limit users in viewing or editing data and to control access to specific files.

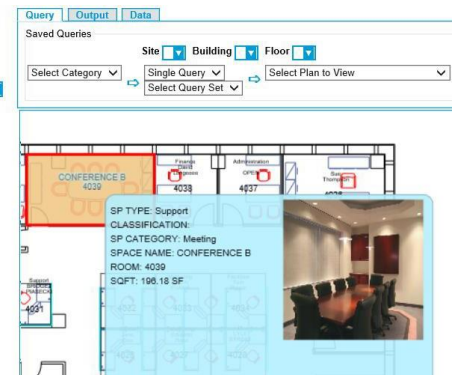

- Integration with the CADapult FM Web Asset & Inventory Manager for viewing furniture and equipment locations and allowing access to manufacturer, warranty, and repair information.
